

Automotive

A Tradition of Excellence...

For Exceptional Performance.

Coleman Cable Inc. is a worldwide leader in the development, design, manufacture, marketing & distribution of wire and cable products. A Broad Range of Products, Innovative Solutions, Recognized Brands, and a Solid Service Platform are the foundation that Coleman Cable's Dedicated, Professional People build upon to create Customer Value. These characteristics, combined with strategic acquisitions, such as Copperfield, establish and strengthen Coleman Cable's leadership position as a one of the premier US-based manufacturers of electrical, electronic and assembled wire and cable products.

The **Coleman Cable Road Power®** brand is one of the most trusted names in the automotive aftermarket. End-users have come to know that Road Power means quality, performance, and reliability through a comprehensive line of booster cables, battery cables, and battery accessories.

Road Power has long been the leader in the evolution of the booster cable, responsible for many industry-first achievements including: the Polar-Glo™ Clamp, Glove-Box Booster, No-Tangle™ Twin Extrusion Cable, No-Shock Clamps, and TPE Jacket Insulation for both low and high temperature conditions. Our most recent accreditation Maximum Energy™ is the industry's first complete line of universal battery cables that are both lead-free and RoHS Compliant (Restriction of Hazardous Substance).

In today's highly competitive world, having a low price is simply just not enough! Work with Coleman Cable and take for granted the best selection of product, easy ordering, superior customer service, and shipments that arrive complete and on-time.

No-Tangle™ Booster Cables

Light-Duty Booster Cables

Road Power® Light-Duty Booster Cables feature dual-extruded wire to provide the user with easy, tangle-free operation. Cables are manufactured with a PVC jacket and the 200 AMP clamps are made from copper-plated steel. Light-Duty Booster Cables comes standard in 10 gauge with 12 feet of length. Booster cables are packaged in retail-style sleeves which emphasize product features and benefits.

Medium-Duty Booster Cables

Road Power® Medium-Duty Booster Cables feature dual-extruded wire to provide the user with easy, tangle-free operation. Cables are manufactured with either a PVC or T-Prene® jacket. While both jackets perform well in warm or cold climates, T-Prene provides additional oil, chemical, and water resistance.

Medium-Duty Booster Cables come standard with 200 AMP copper-plated steel clamps but can easily be upgraded to Polar-Glo™ Clamps. The Polar-Glo™ clamp's triple-polarity identification includes color-coding, indent stamping, and glow-in-the-dark labels. To ensure the highest levels of user-safety, all energized Polar-Glo™ Clamp surfaces are shielded to avoid short circuits and all conductive clamp surfaces are recessed to prevent accidental contact.

Medium-Duty Booster Cables are available in 8 gauge, either in 12 foot or 16 foot lengths, and packaged in a variety of retail-style formats. Some boosters are UL Listed depending on specific model options.

* Does not feature Polar-Glo™ clamps

~ Not UL Listed

Heavy-Duty Booster Cables

Road Power's® Heavy-Duty Booster Cables feature Polar-Glo™ Clamps and T*Prene® jacket insulation. This enhanced line of booster cables ensures the highest levels of user-safety and assures dependability in the most extreme climate conditions.

The Polar-Glo™ Clamp is ergonomically-designed so that it can be easily handled by everyone and it attaches itself firmly to both top and side post batteries. The clamps' triple-polarity identification includes color-coding, indent stamping, and glow-in-the-dark labels. In addition, all energized clamp surfaces are shielded to avoid short circuits and all conductive clamp surfaces are recessed to prevent accidental contact.

T*Prene® insulation was chosen for the wire jacketing material because it remains flexible even under the severest temperatures and is oil, chemical, and water resistant.

Heavy-Duty Booster Cables are made using 6 gauge wire and performs best with small or large automobiles. This line of booster cables is UL Listed, either in 12 foot or 16 foot lengths, and packaged in retail-style boxes designed for easy display.

Extra Heavy-Duty Booster Cables

Road Power's® Extra Heavy-Duty Booster Cables feature Polar-Glo™ Clamps and T*Prene® jacket insulation. This enhanced line of booster cables ensures the highest levels of user-safety and assures dependability in the most extreme climate conditions.

The Polar-Glo™ Clamp is ergonomically-designed so that it can be easily handled by everyone and it attaches itself firmly to both top and side post batteries. The clamps' triple-polarity identification includes color-coding, indent stamping, and glow-in-the-dark labels. In addition, all energized clamp surfaces are shielded to avoid short circuits and all conductive clamp surfaces are recessed to prevent accidental contact.

T*Prene® insulation was chosen for the wire jacketing material because it remains flexible even under the severest temperatures and is oil, chemical, and water resistant.

Extra Heavy-Duty Booster Cables are made using 4 gauge wire and performs best with any vehicle including cars, trucks, or SUVs. This line of booster cables is UL Listed, has several lengths to choose from, and packaged in retail-style boxes designed for easy display.

Commercial Grade Booster Cables

Road Power® Commercial Grade Booster Cables were engineered specifically for the needs of the professional mechanic and feature 500 AMP rated parrot-jaw clamps. Parrot Jaw clamps are manufactured from rugged zinc-plated steel with serrated copper-clad jaws and non-slip vinyl-coated grips. This family of booster cables is constructed with dual-extruded wire to provide the user with tangle-free operation. These booster cables are available in 4 or 2 gauge, in various lengths, and packaged in retail-style boxes designed both for display and storage.

Battery Cables

Maximum Energy™ Lead-Free

Rugged terminal ends are constructed from tin-plated brass that supplies superior starting power for car, truck or marine applications when compared to leaded counterparts. The cable jacket is manufactured from high temperature PVC designed to resist water, oil and chemicals. These lead-free battery cables feature full gauge stranded copper that extends through the entire length of the flattened lug – insuring complete capacity conductivity. These battery cables are RoHS (Removal of Hazardous Materials) compliant and provide the highest-level of corrosion protection while completely removing the dangerous threat of lead contamination.

Cable Savers™

When using a Road Power® Battery Cable Saver™, only the worn terminal-end of the old battery cable is replaced. Simply detach the defective cable from the battery and cut the cable near the corroded terminal. Strip the old cable and attach it to the Cable Saver. Finally, the Cable Saver's lead-free terminal is connected to the battery.

Battery Cable Savers are constructed with tin-plated brass terminals that supply maximum corrosion protection. The rugged jacket is manufactured from high temperature PVC designed to resist water, oil, and chemicals. These unique cables eliminate the need for the same model cable in many different lengths. Road Power Battery Cable Savers feature (3) three models: Top Post, Dual Lead, and Side Post.

Luma-Site® Fluorescent Lights

Engineered to provide maximum light, Luma-Site® Fluorescent Lights were created specifically for the professional. A compact casing ensures the light can be placed in the tightest of spots and a convenient on/off switch guarantees you will have glare-free light only when you are ready. The ergonomic design means the light will sit comfortably in your hand even after a continued period of time. Should you need to work using both hands, a collapsible swivel hook allows you to hang the light in virtually any direction.

High Visibility/Low Temperature

02467

03268

All Weather Cords Featuring Lighted End

High visibility, bright blue cord is easily identified on the jobsite. Coleman Cable's new vinyl compound provides super-flexibility at temperatures down to -45°F. Reinforced blades help prevent accidental bending or breaking and a heavy-duty strain relief protects electrical connections resulting in longer cord life. High Visibility/Low Temperature extension cords come standard with power indicator light in the receptacle to show that the power is on.

American Contractor®

American Contractor® cords are the all-purpose, portable outdoor cord that stays flexible even under the most extreme temperature conditions to -67°F. The rugged T*Prene® construction saves you money because it lasts longer. It provides superior resistance to abrasion, ozone, oil, grease, and chemicals. Plus, the outer jacket is flame retardant and water resistant. All American Contractor® Extension Cords come standard with a power indicator light in the receptacle to show that the power is on.

Industry-leading brands, Diverse product lines.

Coleman Cable has long realized the importance of producing top-quality products backed by strong brands. For over three decades CCI has offered some of the strongest and most respected brand names in the wire and cable industry.

Road Power®

Coleman Cable's nationally-recognized Road Power® brand of automotive products features a wide range of items – from booster cables to battery cables, to RV accessories. All products come in eye-catching Road Power packaging designed for maximum impact. Extensive product offerings, technical expertise, a dedicated effort for customer service and an on-going commitment to provide product innovation are some of the reasons for Coleman Cable's leadership in the automotive aftermarket industry. For the best value and quality in the industry, turn to Road Power brand from Coleman Cable Inc.

Maximum Energy™

Road Power's Maximum Energy™ brand of RoHS Compliant battery cables are free of lead and other hazardous materials. Besides eliminating the threat of lead contamination, these lead-free battery cables provide superior starting power for car, truck, and marine applications when compared to leaded counterparts. Tin-plated brass terminals supply the highest-level of corrosion protection while full gauge stranded copper extends through the entire length of the flattened lug ends, insuring complete capacity conductivity.

LUMA-SITE®

Luma-Site®

Have light and power when and where you need it by using Luma-Site® Work Lights and Retractable Reels. With so many different models, there is one available for just about every job. Engineered to bring power and light to any application, Luma-Site Work Lights & Retractable Reels are constructed from tough materials to stand up to even the harshest work environments. Ergonomically designed heavy-duty handles fit naturally into the palm of your hand for ease of use. Whether being used in the workshop, basement, or garage, Luma-Site Work Lights are the perfect compliment to our Road Power® automotive line.

Exceptional Performance

is reflected in everything we do.

Coleman Cable Inc. customers know they can rely on us to consistently deliver a broad range of wire and cable products and innovative solutions backed by recognized brands. These characteristics combined with a solid service platform and dedicated professional people, create a dynamic customer value that's exclusive to Coleman Cable.

Broad Range of Products -

We provide one of the most extensive and diverse lines of electrical, electronic and assembled products in the industry. Through research, development and strategic acquisitions, such as Copperfield, we continue to enhance our product mix to meet customer needs.

Innovative Solutions -

From custom cables for industrial, aerospace or military applications to the latest in electronic cables for security systems, you'll find Coleman Cable at the forefront of product and technology innovation.

Recognized Brands -

Seoprene®, Royal®, Baron™, Road Power®, Signal®, Copperfield®, Excelene™ and Polar/Solar® all are leaders in their respective markets. Our distributors know that when they provide these leading brands to their customers, they receive instant acceptance and credibility in the marketplace.

Solid Service Platform -

We utilize more than 2 million sq ft of strategically located, state-of-the-art, ISO-certified manufacturing and distribution facilities. This national footprint and extensive investment in service systems powers us to deliver more than 70,000 SKUs with a better than 97% first-fill rate.

Dedicated Professional People -

We deliver strong performance because our people deliver strong performance every day. We've built a culture that puts customer needs first, making us easy to do business with and placing us at the top of our customers' list of suppliers.

Customer Value -

A Broad Range of Products, Innovative Solutions, Recognized Brands, and a Solid Service Platform are the foundation that Coleman Cable's Dedicated, Professional People build upon to create Customer Value.
